Construction Fall Protection Requirements : Checklist

For workers at height, competent persons and safety managers. Adapt every item to your site, equipment and written procedures.

Checklist

- ■ Hazard covered: suspension trauma during a delayed rescue
- ■ Hazard covered: damaged harnesses, lanyards and connectors
- ■ Hazard covered: unprotected edges, holes and skylights
- ■ Decision practiced: select and verify an anchor
- ■ Decision practiced: identify every fall hazard on the task route
- ■ Decision practiced: trigger the rescue plan after a fall
- ■ Decision practiced: inspect harness, lanyard and connectors
- ■ Hands-on part done: donning and adjusting the real harness
- ■ Hands-on part done: inspection of the actual equipment
- ■ Hands-on part done: a site-specific rescue drill
- ■ Review question: was the right protection chosen?
- ■ Review question: was clearance checked?
- ■ Review question: were equipment defects detected?

Stays hands-on and in person

- • donning and adjusting the real harness
- • inspection of the actual equipment
- • a site-specific rescue drill

Related regulation: 29 CFR 1926.503(a). Training scope only; check applicability for your workplace.
