Respirator Training Requirements : Checklist

For respirator users, program administrators and supervisors. Adapt every item to your site, equipment and written procedures.

Checklist

- ■ Hazard covered: damaged straps and valves
- ■ Hazard covered: removing the respirator inside the contaminated area
- ■ Hazard covered: expired or saturated cartridges
- ■ Decision practiced: decide when to change cartridges
- ■ Decision practiced: perform a seal check before entry
- ■ Decision practiced: inspect valves, straps and cartridges
- ■ Decision practiced: recognize oxygen-deficient conditions
- ■ Hands-on part done: fit testing with the actual respirator
- ■ Hands-on part done: medical evaluation
- ■ Hands-on part done: the written site program
- ■ Review question: was removal done outside the area?
- ■ Review question: was the right respirator selected?
- ■ Review question: were defects found?

Stays hands-on and in person

- • fit testing with the actual respirator
- • medical evaluation
- • the written site program

This checklist supports, and does not replace, required training, supervision or evaluation. It does not certify anyone.
