Scissor Lift Training Requirements : Checklist

For scissor lift operators and crews working at height. Adapt every item to your site, equipment and written procedures.

Checklist

- ■ Hazard covered: overloading the platform
- ■ Hazard covered: tip-over when driving elevated on uneven floors
- ■ Hazard covered: crushing between the platform and ceilings or beams
- ■ Decision practiced: check guardrails, gate and controls
- ■ Decision practiced: stop and lower when someone enters below
- ■ Decision practiced: decide when to lower before driving
- ■ Decision practiced: scan the floor for holes, slopes and debris
- ■ Hands-on part done: familiarization on the real model
- ■ Hands-on part done: emergency lowering procedure on the actual unit
- ■ Hands-on part done: site rules for floors and ceilings
- ■ Review question: was overhead clearance kept?
- ■ Review question: were gate and guardrails checked?
- ■ Review question: were floor hazards detected?

Stays hands-on and in person

- • familiarization on the real model
- • emergency lowering procedure on the actual unit
- • site rules for floors and ceilings

This checklist supports, and does not replace, required training, supervision or evaluation. It does not certify anyone.
